East India Company is based on the exploits and adventures of the infamous 18th century East India Companies. Developed by Finland based Nitro Games Ltd., players will enjoy building the World's largest trading empire and engaging in vigorous warfare on the open sea in both single and multiplayer modes. Scheduled to release in Q4 2008 for Windows®, *East India Company* promises to take Real-time Strategy War-games to new levels with its technically advanced proprietary game engine and breathtaking cinematic game environment. Players will have the opportunity to fight, manage and rule one of eight nations from Europe to the Far East.

Kim Soares, Lead Designer of Nitro Games said, "Development of *East India Company* has significantly progressed over the past six months. We wanted to echo these advancements in the official website by adding more interactivity and content, such as forums and my new Designer's Blog. GAME SUMMARY

In *East India Company*, players assume the role of Governor Director of one of the East India Companies or other rival companies. There are eight nationalities to choose from: British, Dutch, French, Danish, Portuguese, Swedish, Italian or Spanish. Your goal – bring new colonies and wealth such as: tea, spices, gold, diamonds and other precious cargo back to Europe, but you must dominate the other rival empires along the way. Wars will be waged and blood will be spilled. Conquer the open sea and explore 40 different cities, towns and villages.

Starting modestly, you will build your fleet, establish connections to far away countries, and keep the rivaling nations at bay. Choose from an array of ship classes, types of transport and military vessels: small sloops, schooners, brigantines, frigates and ship-of-the-line. Create different fleets and assign them to specific trading routes. Controlling well situated ports and upgrading them is one key to success.

Conflicts and wars are inevitable. When hostile fleets engage each other, the spectacular naval battles are fought at a real-time tactical level. Devastating broadsides are fired with a deafening roar and cannon balls tear through enemy ships and their crew. For greater tactical depth, you can, at any point, take direct command of any of your ships and feel the battle close up! Fight against the other European powers to create a trading empire that will rule above all others!
